The Daily Bulletin.

THURSDAY, MAR, 3, 1887.

JAPANESE WRESTLERS. The average Japanese man will weigh 125 pounds. One of the wrestlers will weigh from 200 to 250 pounds, and is head and shoulders above the other people. So marked is the difference that you see them several blocks away as they tower above the crowds in the streets. The women of this class are fine physical specimens also. This is probably the only instance in the world where only the best physical specimens of men and women inter-marry, and the result is such as to deserve attention. The wrestlers form troupes of fifteen or twenty each and travel from town to town, where they always meet a rival troupe and the two companies give exhibitions. By these means there are no hippodromes, but genuine exhibitions of strength, skill and activity.

These exhibitions are generally held in large buildings improvised from bamboo poles for the purpose. They will accommodate thousands of people, and thousands are always there. The rival troupes are scated on opposite sides of the house, and the managers arrange the match. When it comes to the meeting of the champions of the respective troupes the interest is intense and large amounts are staked on the result. The favorites are stimulated by the offer of large sums of money from their friends in case they win. These entertainments last a whole afternoon, and in the large towns extend through a week or two. These athletic sports are popular and so well patronized that wrestlers of any considerable note accumulate small fortunes. The production of such a class of giants in so short a time from so small a race is proof of what might be done to improve the physique of the human race and measurably to banish disease and all infirmities .-- [Japan letter.

A JUBILEE CARRIAGE.

The Queen's coachmakers have just renovated one of Her Majesty's six state coaches, in preparation for the functions of the Jubilee year. The door-handles and armorial bearings are of gold, as also are the crest and Order of St. George upon the roof. The body of the carriage is of vermilion picked out with gold, and the springs and all the ironwork are gilt. Representations of the Crown and Garter are among the adornments of the equipage, which is lined with blue silk. No fewer than four thousand leaves of gold were used in the decoration .- Home News.

THE PAY OF LAW-MAKERS.

In Belgium each member of the Chamber of Representatives receives 200 florins, or £16 15s. per month, or, for the session of eight months,

In Denmark the members of the Landsthing and the Folkething are paid the same salary, 15s. per day. The average number of working days in a session is 145; the total amount of the same is £113 15s. In Portugal, Peers and Deputies

receive an annual stipend of £67. In France Senators and Deputies each get 19,000 francs, or £350 a year, the colonial representatives getting, in addition, their traveling

In Sweden the members of the Diet receive 1,200 rix dollars, equal to £65 14s., for a session of four months, and their traveling expenses. Members of both Chambers are fined 10 rix dollars, or 11 shilling a day if they do not attend.

In Switzerland members of the National Council receive 10s. per day, which is paid out of the Federal Treasury. Members of the State Council are paid by the cantons, and their salaries range from 6s. to 10s. per day.

In the United States Representatives and delegates each receive \$5,000 per year, and their traveling expenses at the rate of 10 cents per

In Norway members of the Storthing receive 13s. and 4d. a day while it is sitting, which is usually

about twelve weeks. In Italy neither Senators nor Deputies are paid, but they get free passes over all railways in the kingdom, and some other concessions as to taxes and patronage, a most ob-jectionable mode of payment, and long since condemned in this and other countries where similar privileges used to be conceded to legis-

In Spain the members are not

paid. In Greece the Senators get £20 per month and members of the Representative Chamber £10 per

In all the local Legislatures in Germany, members, with one or two exceptions, are paid, the salaries averaging in Prussia about 9s. per day and in Austria 20s.

The members of Parliament of Britain, as is well-known, receive no pay and have no direct patronage. Were the members of the House of Lords paid at the same rate as American congressmen, their salaries would amount to about £518,000, and the members of the House of Commons would absorb about £670,-000.—[Philadelphia Record.

Chicago is to build an immense opera house.

A PROJECTED MARRIAGE.

The World hears from Italy that the ex-Empress Eugéne has in per-son communicated her approval of the marriage of Princess Letitia to Prince Roland Bonaparte, and has signified her intention of settling a dot on the young lady, and presenting her with all her jewellery. But the course of what may be presumed true love, nevertheless, does not run smooth, although it is true that the paternal Plon-plon is quite willing that his daughter should wed the son of his despised cousin Pierre and of the milliner Clémence Ruffin. But King Humbert remains obstinately opposed to the match; his repugnance being caused chiefly by the circumstance that Prince Roland's income, of over £30,000 a year, is derived from the profits of the Monte Carlo gaming tables. He was penniless until he married Marie Blanc, who died in 1882, leaving behind her an infant daughter, who is one of the wealthiest children in Europe .- [Home News.

Sir Charles Warren delivered a lecture to the members of the Edinburg Philosophical Institute, his subject being "The English as Rulers of other Races."

The Provost of Wicke has just

received £7,806, bequeathed by the late Mr. Alexander Wares, banker, of Wicke, for the benefit of the poor of the borough.

We should Blot Out Disease in Its Early Stages.

The disease commences with a slight

derangement of the stomach, but, if neglected, it in time involves the whole neglected, it in time involves the whole frame, embracing the kidneys, liver, pancreas, and in fact the entire glandular system; and the afflicted drags out a miserable existence until death gives relief from suffering. The disease is often mistaken for other complaints; but if the reader will ask himself the following questions he will be able to determine whether he himself is one of the afflicted:—Have I distress pain, or determine whether he himself is one of the afflicted:—Have I distress, pain, or difficulty in breathing after eating? Is there a dull, heavy feeling, attended by drowsiness? Have the eyes a yellow tinge? Does a thick, scicky mucous gather about the gums and teeth in the mornings, accompanied by a disagreeable taste? Is the tongue coated? Is there pain in the sides and back? Is there a fullness about the right side as if the liver were enlarging? Is there vertigo or dizziness when rising suddenly from an horizontal position? Are the secretions from the kidneys highly coloured, with a deposit after standing? Does food ferment soon after eating, accompanied by flatulence or belching of gas from the stomach? Is there frequent palpitation of the heart? These of gas from the stomach? Is there frequent palpitation of the heart? These various symptoms may not be present at one time, but they torment the sufferer in turn as the dreadful disease progresses. If the case be one of long standing, there will be a dry, backing cough, attended after a time by expectation. toration. In very advanced stages the skin assumes a dirty brownish appearskin assumes a dirty brownish appearance, and the hands and feet are covered by a cold sticky perspiration. As the liver and kidneys become more and more diseased, rheumatic pains appear, and the usual treatment proves entirely unavailing against the latter agonising disorder. The origin of this malady is indigestion or dyspepsia, and a small quantity of the proper medicine will remove the disease if taken in its incipiency. It is most important that the disease should be promptly and properly treated in its first stages, when a little medicine will effect a cure, and even when it has obtained a stiong hold the correct remedy should be persevered in correct remedy should be persevered in until every vestige of the disease is cradicated, until the appetite has returned, and the digestive organs restored to a healthy condition. The surest and most effectual remedy for this distress-ing complaint is "Seigel's Curative Syrup," a vegetable preparation sold by syrup," a vegetable preparation sold by all chemists and mdicine vendors theoughout the world, and by the pro-prietors, A. J. White, Limited, London, E. C. This Syrvp strikes at the very foundation of the disease, and drives it, root and branch, out of the system. Ask your chemist for Seigel's Curative Syrup.

"East-street Mills, Cambridge-heath,

"London, E. C., July 24th, 1882 "Sir,-It gives me great pleasure to be able to add my testimony in favour of your valuable Syrup as a curative agent. I had suffered for some length of time from a severe form of indigestion, and the long train of distressing symptoms following that disease. I had tried all possible means to get relief, by seeking the best medical advice. I had swallowed sufficient of their stuff to float a man. of-war, so to speak, but all to no avail.

A friend of mine, coming on the scene in the midst of my sufferings, brought with him a bottle of your Seigel Syrup; he advised me to try it, stating he felt confident it would benefit me. Being weary of trying so many drugs I conweary of trysng so many drugs, I con-demned it before trial, thinking it could not possibly io me any good, but ulti-mately determined to take the Syrup. After doing so for a short time it worked such a change in me that I continued taking it for nearly two months, and I then felt thoroughly cured, for I have discontinued its use for five weeks, and feel in the best of health, and can par take any kind of food with ease and comfort. I am therefore thankful to you that, through the instrumentality of your valuable medicine, I am restored to the state of health I now enjoy.—Yours truly, W. S. FORSTER. "To Mr. A. J. White."

Those who are in the "Asthma Fur nace" should lose no time in obtain ing relief by the use of "The Rosing-weed Tar Mixture;" but do not use the medicine unless you will follow all the directions "to the letter."

Poor Asthma sufferers, who are restorer, balmy sleep," should make use of "The Rosinweed Tar Mixture." Quiet refreshing sleep will follow its use.

"Waterloo House, London Stile, Chis-

wick, "February 17th, 1882. Messrs. White and Co., London.

"Gentlemen,—It is with great pleasure that I add my testimony to the wonderful effects of Seigel's Syrup. For years I nad been suffering from billous attacks, which began with giddiness; then a mist would come before my eyes, or that I should not be affect. so that I should not be able to recognise any one or anything at the distance of a yard or two from my face. This would be followed by excessive trembling of my knees, so that I could not stand my knees, so that I could not stand without support; after which a severe headache would occur, lasting often two or three dags. I have tried various remedies for these distressing symptoms, but until I tried Seigel's Syrup I had no relief. Since then I have had excellent health in every respect, and if ever I feel a headache coming on I take one dose of the Syrup, which arrests it. Hoping that this testimonial may be the means of inducing others (who suffer as I used) to try the Syrup, as I feel sure they will receive speedy benefit and ultimately be cured, I beg to remain, yours faithfully, yours faithfully,

"A. II. HORTON."

Seigel's Operating Pills prevent ill effects from excess in enting or drinking. A good dose at bed-time renders a person fit for busindss in the morning. If you have Asthma use 'The Rosinweed
